## Assembly Instructions

Please use gloves for assembly.

1. Insert and push each wheel into the base.

2. Remove the red protecive cap on the top of the base if present. Insert the hydraulic lift cylinder into the center of the base.

3. Place the telescoping cover over the hydraulic lift cylinder.

4. Remove the pre-assembled bolts and washer from the seat back with the hex wrench.

9. Insert top of the hydraulic lift cylinder into the mounting hole on the control unit, then place the chair upright.

5. Remove the protective foam covers from the brackets of the seat base. Position the backrest carefully between the brackets. Insert all 4 bolts (2 on each side) and bring to a loose fit with the hex wrench. Tighten each bolt simultaneously until all are snug.

6. Install the side covers and tighten the bolts to secure them in place. (Place the cover designated "R" on the side of the chair with the lever.)

7. Rest the chair on the seat back. Remove the 4 pre-mounted bolts and washers from the underside.

8. Align the multi-tilt control unit with the holes on the underside of the chair, making sure the "front" arrow is pointing towards the front of the chair. Insert the bolts and washers and tighten all bolts simultaneously.
